

Dear FCC:

I listen to KLOVE radio on 105.5 in Tempe, AZ (Phoenix area). I enjoy their music and good words from the Bible. I also am able to get information about local events and concerts that are happening in my area. I think that KLOVE has a very positive effect on the Phoenix area and its listener-base. I would be very disappointed if one of the Phoenix area frequencies were displaced by another Low Power FM broadcaster. I feel that another LPFM broadcaster would not provide the same music, news, and community information that KLOVE provides to me. Thanks for hearing my comment.
